ALISA

The character had primarily decided from the start that the character would be able to fly, remove her head, and have chainsaws come out of her arms. Some of these features were played in one of the versions sold abroad.

MALE CHARACTERS

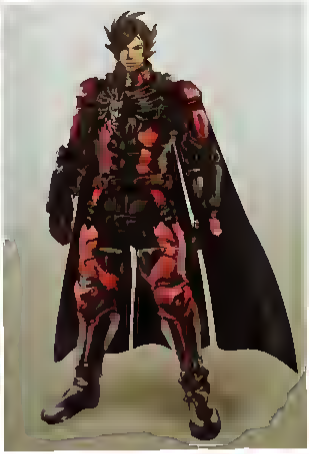
Some of the customized costumes are far from suitable for fighting,
but hardly appear out of place because of the uniqueness of the characters.

LARS

Hail Sweden. Lars is the son of Heihachi Mishima. The development team had planned to include a Tekken Force character from around TEKKEN 3. His stand was deemed after receiving feedback from the Shindaikei dendrology in Japan.



LEO

Leo is the first character from Germany. From the start, the development team wanted to create a character that would be loved by fans regardless of gender so they made the gender of Leo ambiguous on purpose. Of course, Leo is just a nickname based on the character's name.

MIGUEL

Miguel is the first Spanish character in TEKKEN. He is a novice when it comes to fighting arts, preferring to brawl. The development team had a difficult time creating animation that matched his setting as a novice to martial arts, the overemphasized motions and off-balanced movements, for example.

BOB

The concept of Bob is in the gap between his appearance and his character. Although he is obese, he is very nimble. He is actually quite slim with a strong sense of justice making him a strong and cool character. His full name is Robert Richards.
